Heads of Health Institutions,
Deans of Medical Faculties,

Issuing of Gender Recognition Certificate for Transgender Community

Transgender is an umbrella term for all people whose internal sense of their gender (their gender identity) is different from the sex they were assigned at birth. For example, a transgender woman is someone assigned male at birth who identifies as female (WHO 2015).

Transgender people are often socially, economically, politically and legally marginalized. Discrimination and vulnerable to harassment, violence and sexual assault and discrimination in access to public spaces like restaurants, cinemas, public toilets are common. Therefore amending the sex designation on a birth certificate is an extremely important step for a transgender person, to accurately reflect on this legal document the sex with which the individual identifies, and as required proof of sex to obtain other identity and legal documents.

Considering above facts, Ministry of Health, Nutrition and Indigenous Medicine has decided to establish services for transgender communities in every institution, with capacity of specialist psychiatric care (Consultant Psychiatrist).

When a person requests service, the responsible consultant psychiatrist will provide the care which includes assessment, counseling and issuing a **Gender Recognition Certificate (GRC)** to assist with the process of changing the sex on a birth certificate. The certificate could be issued only to those above 16 years of age and it will indicate the desired gender as to be shown in birth certificate. This document has to be certified by a Consultant Psychiatrist and then the Head of the Institution working under the Ministry of Health.

When a person in the private sector requests it, he should be referred to the closet government hospital with a Consultant Psychiatrist to obtain the certificate.

A system is established on Transgender information management; maintain a register at the institution for effective monitoring of the services. The Directorate of Mental Health is currently taking steps to set up process for transgender information management. Two main documents need to be maintained.

- Transgender Notification Register (TNR); When a person is issued GRC, information such as name, date of birth, birth sex, desired gender, National Identity Card number, bed-head ticket/clinic number should be entered in the TNR. Register will be maintained in the Psychiatric unit of the institution.
- Gender Recognition Certificate will be prepared in triplicate with one to be issued to the person concerned, the second to be retained at the hospital and third to the Directorate of Mental Health, Ministry of Health.

Kindly make arrangements to make aware all the Consultant Psychiatrists and other relevant officers in your institution on the above to stream line services for transgender persons and issuing the Gender Recognition Certificate. A copy of the certificate and sample of the register is attached herewith for your information. More details can be obtained from the Directorate of Mental Health, Ministry of Health, Nutrition and Indigenous Medicine.
